

New in the CL-150: Add and Edit Learned Vocab

You can now add new words and phrases—or edit existing words and phrases—in the Learned Vocab Management dashboard.

The CL-150 Platform provides full-stack support for language programs: instructors create lessons, linguists learn and review material, and program managers track and report on that learning—all from directly within the CL-150. But language is everywhere—you come across words and phrases daily, in newspaper articles, on social media, and even in our Phrase of the Day.

That's why you can now add to and edit your Learned Vocab. Now, when you come across words and phrases from external sources, you can add them within seconds, refresh as needed, and retain them long-term. Watch the video below for a quick walk through of this new feature.
