

New in Lesson Authoring: Lesson Unlocking, Excel Import, and More

We recently added another batch of features and updates to [CL-150 Lesson Authoring](#), the lesson creation technology for quickly building compelling, multi-activity language lessons that work on almost all common smartphones, tablets and laptops.

Lesson Unlocking

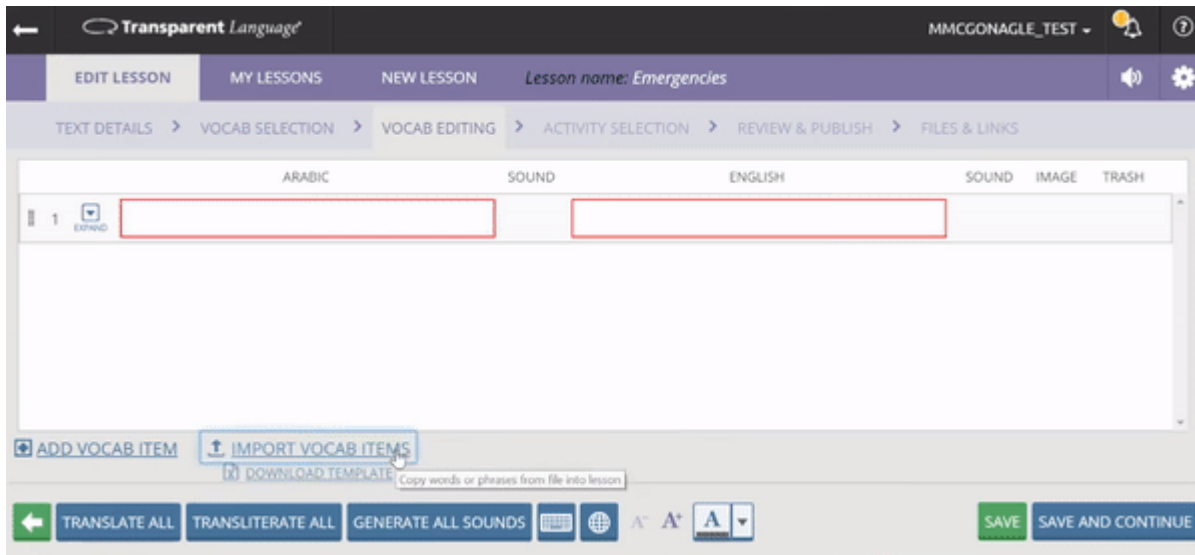

We listened to your feedback about lesson unlocking—we know how painful it was to lose progress when editing the lesson text, even just to fix a typo. But no more! Authors can now make changes to the lesson text on the Text Details screen without losing any progress. Once you make your changes and click Save and Continue, a message will warn you which activities need to be updated to maintain consistency. You'll also see reminders on the Activity Selection screen, where certain activities will have a “Needs Review” label.

The screenshot shows the 'Text Details' screen in the lesson authoring software. At the top, there are navigation tabs: 'EDIT LESSON', 'MY LESSONS', 'NEW LESSON', and a lesson name 'ILR 2+ 2019 Chinese Court Says Ap...'. Below the tabs is a breadcrumb trail: 'TEXT DETAILS > VOCAB SELECTION > VOCAB EDITING > ACTIVITY SELECTION > REVIEW & PUBLISH > FILES & LINKS'. The main content area is divided into two columns. The left column has a 'Text:' label and a text area containing Chinese text about Qualcomm's legal victory against Apple. The right column has a 'Source URL:' label and a text area containing a URL. Below the URL field are fields for 'Source/Origin:', 'Date of source publication:' (with a date picker set to 02/06/2019), and 'Objectives:'. At the bottom of the text area is a 'Tags:' field. The interface also includes a toolbar with various editing tools and a 'PREVIEW' button.

Excel and B4X Import

Vocab items can now be imported from an Excel (.xlsx) file. Want to re-use vocab items from an existing list in the CL-150? Download the B4X and import it on the Vocab Editing screen.

Vocab Editing - Autogenerate Transliteration

You can now autogenerate transliteration for vocab items using the “Transliterate All” button. Transliterations are powered by Google Translate’s Transliteration service and can be edited after generation if any adjustments are needed.

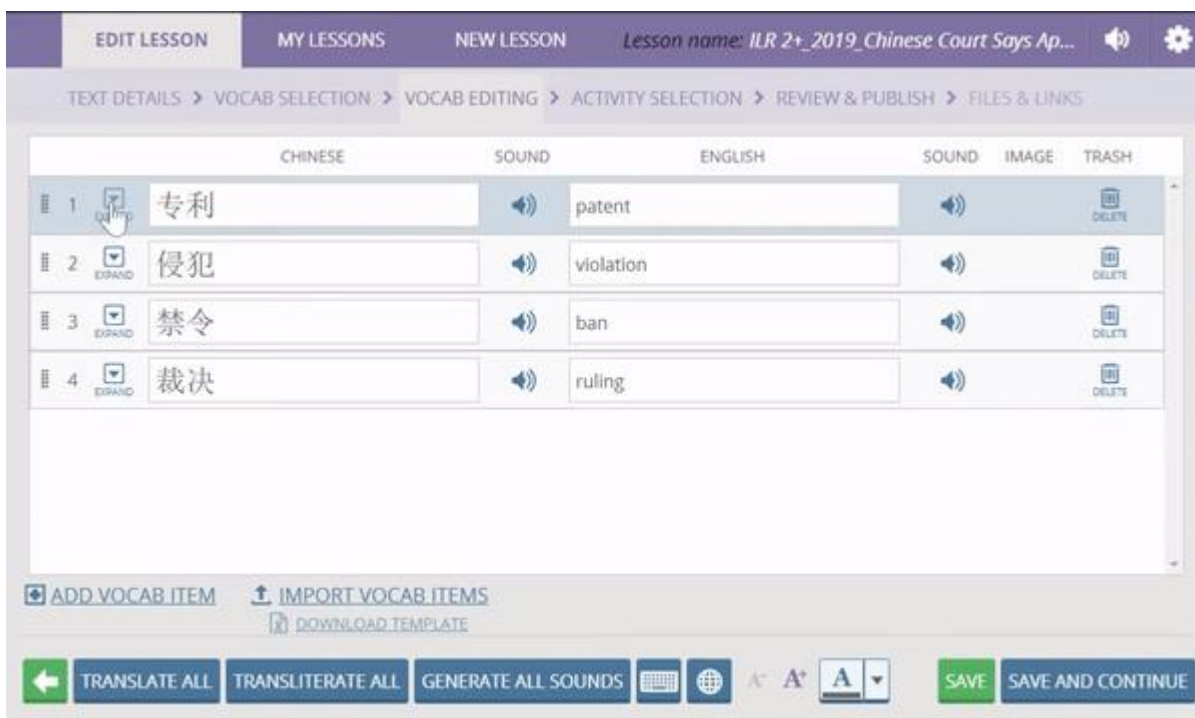

Table Activity Configuration

Colors and font style formatting can now be imported from an Excel (.xlsx) file. Authors can create tables in Excel with font colors and other formatting, which will be retained when imported into LessonGin in the Table activity.

Russian • Table 0% Complete

Fill in the highlighted blank by selecting an answer on the right

infinitive	понимать	думать	знать
meaning	to understand	to think	to know
stem	понима-	дума-	зна-
я	понимаю	_____	знаю
ты	_____	думаешь	знаешь
он/она	понимает	_____	_____
мы	понимаем	_____	знаеме
вы	понимаете	думаете	знаете
они	понимают	думают	знают

Slide Show Activity Configuration

The Slide Show activity now supports line breaks, making it easier to format longer slides.
