New for Program Managers: Reporting Group Overview Pie Charts

If you manage dozens or hundreds of linguists with the CL-150 Platform, we've got something sweet for you. (Here's a hint: 🧀)

Get an instant snapshot of your language program's health with new interactive pie charts for CL-150 Reporting Groups. You can now set up a custom dashboard to track:

📈Sustainers' proficiency levels (overall or by modality)

✅Weekly or monthly requirement status

📅Test expiration dates

…and more!

Just like the pie charts themselves, we can show you better than we can tell you. Watch the video below to see how easy it is to customize your reporting group dashboard and start mitigating problems.
