

# Assign YouTube Videos, PDFs, and more in the CL-150 Platform

You've found the perfect YouTube video for your lesson, or you have a PDF you want students to read before class.

You could shoot an email with a link or attachment, but you won't know if your students even opened it.

You can now assign videos and files to your classes just as you would assign a CL-150 lesson!

The class and learner reports will capture time spent on the multimedia assignments just like any assigned lesson, too, so you'll always know whether or not your students are engaged.

**[Join us for a live demo](#) on July 15<sup>th</sup> to learn how to assign YouTube videos, PDFs, PowerPoints, images, spreadsheets, and more.**
