A More Streamlined CL-150 Platform

Next time you log in to the CL-150 Platform, you'll notice a more streamlined experience. The Resources page, more lovingly known as "that page with all the tiles", is no more.

Learners will log in directly in the learning portal. Program managers are brought straight to the program manager portal. And so on.

You can easily navigate between portals using the new Portal Switcher. We'll remember where you left off so you can pick back up on your next session.

See the new streamlined portals and discover where to find the rest of your favorites—including proficiency tests and lesson authoring—in this quick video.
